

# EcoSoft Messenger

## Overview

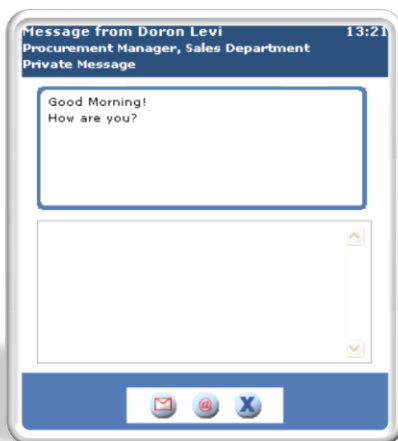

*EcoSoft Messenger is a messaging software designated for internal network usage. It's an easy, safe and secure way to instantly reach others within your network.*

*Comfortable to use and maintain, it enables access to users in different location. With no heavy system requirements and strong technical support **EcoSoft Messenger** is an excellent solution for your organization.*

## Your Instant Contact With People

Get in touch with the people who are currently on your network, regardless of their geographical location.

Providing visual representation of the users within your network, **EcoSoft Messenger** is a great communication tool for exchanging instant messages.

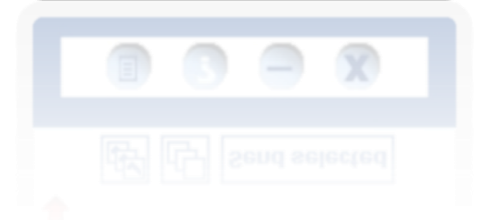

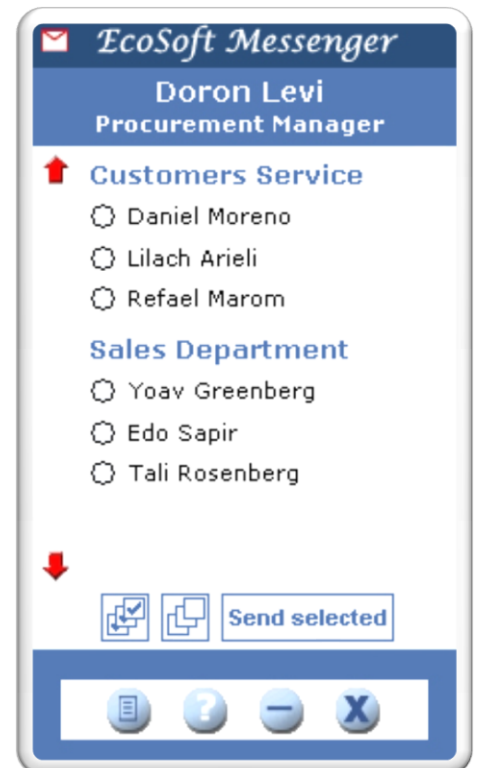

You can contact users from your network with just a single click. With a friendly and easy to use interface contacting people from within your network is easy!

**EcoSoft Messenger** also integrates with your personal information manager (PIM) so you can send your reply via email, if you wish to.

With the ability to have simultaneous conversations, choosing whether to send a message to one user or a group of users, **EcoSoft Messenger** facilitates quick exchange of information, allowing you to be effective and efficient and thus saves time and money.

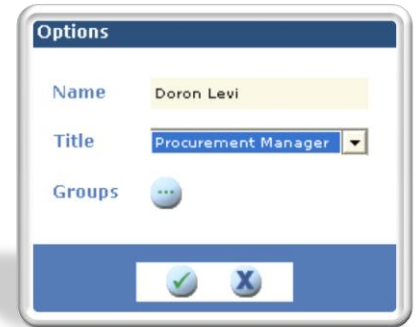

## Client Side

**EcoSoft Messenger** has a Lightweight client, with minimum resource allocation. It enables communication only within your network, with no access to or from outer network. Whenever sending and conveying sensitive and discreet information is of an essence, you can use **EcoSoft Messenger**.

## User Identification

**EcoSoft Messenger** is able to integrate with the organization's database and secure user's identity, hence preventing impersonation of users. There is no need for additional user sign-in credentials - all users can be identified by their network unique identifier.

## Server Side

**EcoSoft Messenger** is based on Server-Client architecture<sup>1</sup> using minimum network bandwidth by lightweight protocol and by data compression. The server handles up to 8000 parallel users and can easily be expanded to more. Requiring minimum resources, using SQL server<sup>2</sup> and with smart recovery mechanism, **EcoSoft Messenger's** server provides maximum communication reliability.

## Start Using EcoSoft Messenger

It's simple and easy; with a friendly UI you can start using **EcoSoft Messenger** straight away. No installation required.

## Tailored Solutions

EcoSoft's Tailored solutions - meeting customers' requirements, we can customize **EcoSoft Messenger** to suit your needs.

## Requirements
